WATER THAT MOVES YOU®

**Step into a J-400™ Collection hot tub and step outside the box.** Leave it to Jacuzzi®, the inventors of the modern hot tub, to rethink traditional hot tub design. With the J-400 Designer Collection, Jacuzzi literally breaks the mold by taking its trademark WaterColour™ waterfall to new heights. Graceful curves present a dramatically new, contemporary spa profile, and a natural backdrop for cascading water and light.

**Spas that are new from the inside out, with patent-pending features.**

- Elevated WaterColour waterfall
- iPod® Docking Station with AquaSound™ Stereo System option – a Jacuzzi exclusive
- New PowerPro® NX2 neck jets, illuminating IX Jets, rotating RX Jets, and BX Bubbler Jets
- Enhanced interior lighting
- Adjustable pillows
- New color selections for shells and cabinetry
- Optional accent lights on outside corners
- Energy-efficient, quiet, and reliable filtration system

**The coolest name in hydrotherapy since 1956 is still hot today.** Technology started the industry, with the Jacuzzi brothers' invention of the first hydrotherapy pump.

Jacuzzi continues to lead the whirlpool bath and spa industry with hydro-technology solutions designed to make you feel good. The company has earned ISO 9001: 2000

Certification, the premier quality rating for design, manufacturing and distribution. In addition, industry and consumer organizations, and publications such as *Pool and Spa Living* have recognized Jacuzzi for excellence in design and customer service.

**What a J-400 will do for you.** No matter which J-400 hot tub you choose, be prepared to feel healthier and more relaxed every time you experience the benefits of Jacuzzi hydrotherapy.

## J E T S

### PowerPro NX2 Jets

Advanced NX2 Jets effectively relieve tension and strain in the sensitive (and hard-to-reach) neck area with a highly focused stream of water. Change the direction and intensity of the massage by turning the inside nozzle.

### PowerPro SX Jets

PowerPro SX Jets provide relief to key pressure points on the hands. These pressure points are stimulated by the jets' hydrotherapeutic massage to relieve tension in other parts of the body, even as they comfort the hands themselves.

### PowerPro BX Jets

The new BX "Bubbler" Jet represents another Jacuzzi milestone in jet technology. As part of the exclusive ProAir™ Lounge system, this unique patent-pending jet massages the calves with a comforting yet rejuvenating bubbling effect.

### PowerPro FX Jets

Jacuzzi introduced these jets, with their unique directional rifling action that creates a spiral stream of air and water – perfect for stimulating small muscle groups. Fully-adjustable for high or low pressure, exclusive PowerPro FX Jets have a rejuvenating effect and can help overworked, overstressed muscles and joints.

### PowerPro FX2 Jets

Patent-pending jets that deliver intense hydrotherapy without moving parts, FX2 Jets are the larger, more powerful version of the original Jacuzzi FX Jets. Their distinct spiral action produces a surging stream of air and water that provides a vigorous massage to shoulders, back, calves and feet.

### PowerPro IX Jets

The all-new PowerPro IX Jet creates a dramatic stream of light and effervescence. The IX Jet merges maximum airflow with high-output LED lighting, sending multi-colored, champagne-like bubbles from the bottom of the hot tub to the surface.

### PowerPro RX Jets

The spinning action of the new patent-pending PowerPro RX is fully adjustable. Simply turn the dial on the face to customize the pressure or turn off the jet action entirely. Modest in size, the RX Jet covers a sizable area, reaching the key muscles and nerves of the back for a pampering hydromassage.

### PowerPro MX2 Jets

Based on the form and function of the original Jacuzzi jet created 50 years ago, the new-generation, patented, MX2 Jets deliver maximum volume at a higher air-to-water ratio. PowerPro MX2 Jets are strategically located to deliver a bold massage, especially effective for muscles in the lower back.

### Fasten-your-seat-belt jet power: standard with every J-400 Collection hot tub.

Jacuzzi Hot Tubs perfected the bubbling, warm-water home spa session, but they are famous for the big, bold, hydrotherapeutic massage. The Jacuzzi PowerPro System™ drives all of the jet action, soft or strong, with low-pressure, high-volume pumps. Besides delivering versatility and power, the PowerPro System is energy efficient and durable.

### Jets and Jacuzzi go way back.

The jets featured in Jacuzzi hot tubs are based on the design of

the first Jacuzzi jet created 50 years ago. That jet was the predecessor of today's PowerPro MX2, which delivers a 50/50 air-to-water mix that massages deeply and gently at the same time.

**Technology shows its sensitive side.** Different muscle groups demand different types of massaging jet action. Each of the versatile jets in the J-400 hot tubs delivers a full range of massages, from robust and stimulating to gentle and rejuvenating. Selected adjustable jets let you control the way they perform just by turning their "faces" or nozzles.

### Water in motion

Jet diverter valves activate water going to groups of jets on either side of the spa, in the middle, or split the pressure between groups. They also allow you to adjust water pressure up or down, and control the flow of water to jets in the seats.

**Seating Capacity: 6 adults****Total PowerPro Jets: 48**

The J-480 model features more jets than any other hot tub in the collection. It includes the new IX, NX2, RX and BX Jets.

**PowerPro Therapy Lounge**

One of the best lounge seats in any hot tub, it includes new RX rotating jets for the back and BX Jets for wrists and calves.

**J-480 is the shape you want to be in.**

The J-480 model showcases the Collection's dramatic new curved profile. Behind the WaterColour feature, the shaped acrylic edge creates a vertical drop that plays up the waterfall effect – so you can relax as water flows over your shoulders. The J-480's asymmetrical lines present a fresh spa silhouette, unlike any other.

**Surround yourself with a feeling of relaxation.**

Give in to the luxury of Jacuzzi hydrotherapy, cocooned in a world of cascading waterfalls and warm jet streams. 48 PowerPro Jets produce virtually any massage type, from deeply invigorating to tension-relieving. There are three therapy seats in the J-480, in addition to the lounge, each one designed to provide a targeted hydromassage for specific muscle groups.

**AquaSound Stereo System Option with iPod® Docking Station and Auxiliary MP3 Jack**

- Dock your iPod and it plays music from the spa's speakers. The AquaSound system includes a 3.5 mm input jack for MP3 players, as well as a CD player, AM-FM radio, and powered subwoofer.
- Four waterproof micro-speakers are mounted near the pillow headrests, with the stereo located on the spa's side panel.

**Seating Capacity: 6–7 adults**

**Total PowerPro Jets: 39**

Open seating in the J-470 model lets you move easily from one seat to another.

**PowerPro Combo Therapy Seat**

Maximum-volume MX2 Jets deliver a powerful overall massage while NX2 Jets concentrate on the neck area.

**New features inspire you to slow down and take it easy.**

Jacuzzi J-400 spas, like luxury automobiles, provide padded headrests that move up and down to accommodate different body heights. Another one of the many ways Jacuzzi helps you relax, the J-400 Collection's adjustable pillows are unlike those in any other spa. At night, colored lights glowing from the waterfalls and from new underwater lights add to the peaceful feeling.

**Comfort comes in your size, with seats in a variety of depths.**

The experts at Jacuzzi build in features to personalize the home spa experience. Seats are molded to support the body; in the J-470™, every seat is designed for easy access to the foot jets, as well. Highly-effective neck jets and five of Jacuzzi's vigorous new PowerPro FX2 Jets are featured in this spacious spa.

**Exclusive design technology**

- Newly designed, patent-pending, adjustable pillow headrests move up and down, feel soft yet sturdy, and are generously sized.
- New PowerPro IX Jets combine maximum airflow with bright LED lighting for a champagne-bubbles-in-a-glass effect.

**Seating Capacity: 4-5 adults**

**Total PowerPro Jets: 37**

The J-465 is distinguished by a single WaterColour waterfall and a full-body lounge.

**All-new ProAir™  
Lounge Seat**

Recline for a total massage from rotating RX Jets, BX Bubbler Jets and MX2 foot jets.

**Good times are just outside your door.** With a J-465 in the backyard, you're never far from having fun. It's perfect for a party, or relaxing alone. Stretch out in a full-size lounge that goes to great lengths to massage your entire body. Adjust the pillows and settle into the intimacy of side-by-side seating. The WaterColour waterfall and the effervescent IX Jet cast a glow over the scene at night, and illuminate the curves of the spa.

**The J-465 adds natural beauty to any backyard.** Like all the spas in the J-400 Collection, the J-465 features a choice of new color palettes for shells and cabinetry, each designed to blend with the landscape and complement your home's exterior. Roasted Chestnut, the newest natural wood color in the Jacuzzi line of ProEndure™ UV-resistant spa cabinetry, adds a rich, deep-brown option to the line.

**Dramatic lighting inside and out**

- The WaterColour waterfall appeals to the senses of touch, sound, and sight.
- Add on new Jacuzzi ProLites™ Exterior Accents with automatic daylight sensors to illuminate the area outside the spa with LED lighting.

**Seating Capacity: 5 adults****Total PowerPro Jets: 33**

The J-460 is a low-profile patio spa with all the luxury features you would expect from a Jacuzzi Hot Tub.

**Original PowerPro  
FX10 Therapy Seat**

Roomy, precision-sculpted seating cradles your body securely for a therapeutic 10-jet massage.

**J-460™ is good for your  
environment.**

A relaxing hydromassage in a J-460 model can help you renew the energy drained away by stress and fatigue. Hydrotherapy is known to promote better sleep habits and relieve muscle tension. New varieties of hydrotherapy jets are featured in the J-460, including the illuminated PowerPro IX Jet. Think of the J-460 as a personal meditation area and therapy center (also works well for parties of five).

**Engineering and advanced  
options save energy and costs.**

Jacuzzi designed the ProStream™ Circulation System to make every J-400 Collection hot tub run efficiently. The J-400 hot tubs are ozone-ready too, so you can opt for purer water with fewer chemicals by using ozone.

**Convenient styling elements**

- Integrated sculpted beverage holders and the ergonomic handle for the diverter are new for 2007, along with a rocker switch for more reliable air control.
- LCD lighted control panels provide push-button access to change temperature settings, operate the jets, and lock in settings.

**Imaginative illumination adds impact.** The J-400 Collection hot tubs feature coordinated lighting sources. The WaterColour waterfall is lit by a rotating rainbow that can also be set to one color. This water feature works independently of the jets, so you can enjoy it even when you're not in the hot tub. The PowerPro IX Jet lights up the depth of the spa and shines on the surface for dramatic effect, highlighting the bubbles as they rise from the jet. The new, lighted Jacuzzi logo inside the spa enhances the beauty of the spa's water against the polished acrylic surface, bathing it in subtle color. For outside the spa, Jacuzzi introduces ProLites Exterior Accent Lighting, LED fixtures with automatic daylight sensors that can be added to brighten the area outside the hot tub.

**J-400 hot tubs include new ways to keep water clean and clear.**

The ProStream Circulation System and a sophisticated, yet simple, three-step process help maintain the water's purity with fewer chemicals and less maintenance than other spas.

1. ProClear™ Skimmer removes floating particles.
2. The ProClear II pleated cartridge filter, embedded with patented anti-microbial Microban® Technology, works with the 24-hour circulation pump to consistently clean the surface of the water and remove suspended contaminants.
3. ProCatch polishing filter bag (shown in photo) removes sand and particles from the bottom of the spa during jet pump operation.
4. Optional ProClear Ozonator utilizes corona discharge technology to safely produce three times the purifying ozone concentration level of standard UV-ozone systems.

**The J-400 Collection puts great ideas into circulation.**

The high-flow ProStream Circulation System cycles 35 gallons of water per minute through the pleated cartridge filter, and moving water means cleaner water. The ProClear Filtration System includes three levels of filtration technology that remove impurities from the water, working with The ProClear Skimmer, the ProCatch polishing filter and the ProClear II Filter with Microban anti-microbial action. The idea is to keep your spa's water clean and pure with almost no upkeep required.

**The energy-wise system is engineered to perform.**

The dedicated circulation pump is engineered to coordinate with Jacuzzi's patented 50/50 air-to-water mix jet system, resulting in low pressure, high volume massage action. The energy-efficient control system senses the water temperature and automatically ensures that it is controlled to the desired comfort level. The quiet-running pumps allow you to enjoy the refreshing and soothing sounds of moving water, from inside and outside the spa.

**Choose a J-400 for minimal chemical usage and enhanced energy savings.**

The patented ProClear Ozone Injector by Jacuzzi works with the ProClear Ozonator option. Using corona discharge technology, this system effectively infuses a steady stream of ozone into the water to neutralize impurities for consistently superior water quality. A titanium heating element helps keep the water warm at minimal cost.

## SPA CHOICES

### Jacuzzi is the right choice.

No matter which model and colors you select, you can rely on excellent performance from your J-400 Collection hot tub. Jacuzzi offers quality additions as well, like exterior lighting, the ProClear Ozonator system, and accessories built to match the spa's cabinetry. The Jacuzzi Hot Tubs Warranty is the most comprehensive in the industry. For more information about options, warranty, and product certification details, please visit [www.jacuzzi.com](http://www.jacuzzi.com) or your local Jacuzzi Hot Tubs dealer.

### Optional AquaSound Stereo System

includes iPod® Docking Station and Auxiliary MP3 jack, plus CD player, AM-FM radio, and powered subwoofer.

### Guaranteed to rock.

Jacuzzi is the first spa manufacturer to offer the iPod Docking Station option on selected spas.

This product has been designed specifically to work with iPod and has been certified by the developer to meet Apple performance standards.

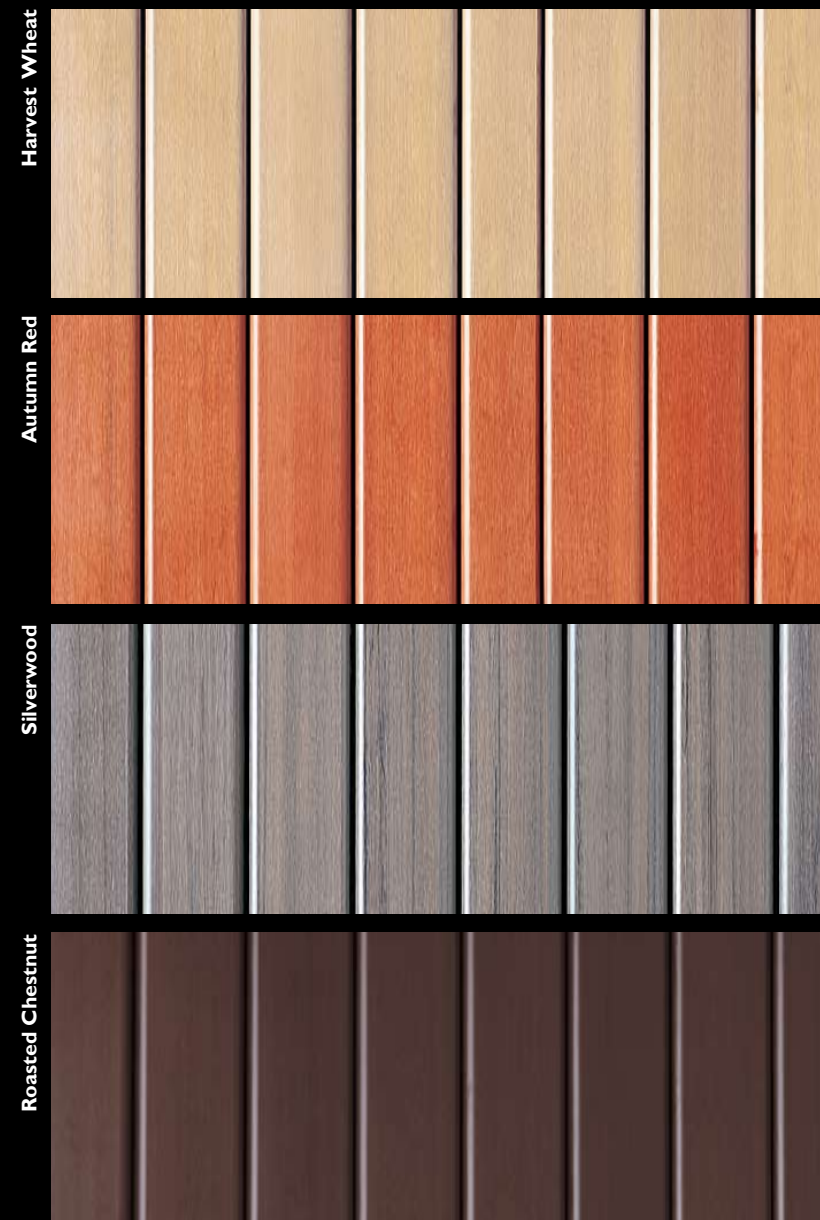

## COLORS

The Jacuzzi TriFusion System™ produces a durable acrylic spa shell that is eight times stronger than conventional shells. The top layer of acrylic is available in a choice of colors and textures that hold their beauty for years.

ProEndure™ synthetic wood cabinetry is durable and UV-resistant. Sturdy, locking covers coordinate with the look of the hot tubs and are customized to fit the new spa molds.

## ACCESSORIES

Design an entertainment area around your J-400 Collection hot tub with accessories from the Jacuzzi Exclusives™ Collection. Synthetic steps, stools, bars, surrounds, gazebos, covers and other items are built to coordinate with the color, shape and size of your spa. More information is available at [www.jacuzzi.com](http://www.jacuzzi.com).

### ProTemp™ In-Home Spa Status Display

Check on the temperature of the water in your J-400 Collection hot tub without venturing outside. A glance at the ProTemp In-Home Spa Status Display option saves you a trip outdoors on those cold, wintry evenings.
